

BOOK MAKING WORKSHOP

Darlene would be happy to visit your school and present her book making workshop. Using simple, everyday materials and techniques, she will demonstrate in clear, step-by-step directions how to make books that can be used to hold photos, drawings and stories created by students in the classroom. Students from **first grade on up** can complete a book to take home. Most book designs require materials readily available in a classroom setting such as: 8"x11" paper, construction paper or card stock, scissors, rubber bands, and drinking straws.

More complex book designs for **older students** require the use of a needle and thread or twine for binding, embellishments such as beads, ribbon and feathers, and glue for hard cover books.

A sample of some of the designs can be seen in the photo.
